

Project Designer-Interiors - (BI 0001AN)
Description

The Buildings & Infrastructure (B&I) Line of Business is a global network of approximately 11,500 employees, which serves both the private and public sector. Our employees work to shape the communities we live in by creating world-class projects that transform the future development patterns of those communities. We provide our clients award-winning planning, engineering, architectural and interior design, construction and program management, and design-build project delivery. The Jacobs business model allows us to successfully service our clients, leverage our integrated services, and provide our employees with growth opportunities while delivering global solutions to our client's local programs.

We consistently receive high rankings from Engineering News-Record (ENR) in many classifications, including the categories of Top Design Firms, Top Contractors, Top Green Buildings Design Firms, and Top Transportation Companies.

Position Summary

This is a great opportunity to join Jacobs B&I (Buildings & Infrastructure) Interiors Studio. You will utilize your commitment to design and superior customer service to provide a platform that will broaden your career. As a Project Designer you will work independently as a project designer on smaller projects or may work under the direction of the Senior Project Designer on larger ones. Assists in setting assignment objectives and work is reviewed for adequacy and accuracy. Participates in the implementation of the project process including programming, space planning, conceptual design, design development, and construction documents. Interacts with external personnel and clients on significant matters.

- Expert 3D conceptual skills with the ability to communicate design ideas and direction.
- Collaborate on commercial interiors projects, including programming client needs, conceptual and schematic design, design development, construction documents while conforming to budgets and schedules.
- Experience managing client expectations, team communication and consultant coordination.
- Contribute to office activities, initiatives and learning programs.
- Promotes firm and project goals of excellence in design, execution and sustainability.

Qualifications

- Bachelor's degree in Interior Design, Architecture or related field from an accredited school required
- 6+ plus years' experience in a corporate design environment required
- Expert computer skills to include Revit and AutoCAD as well as knowledge of Adobe Creative Suite, SketchUp required
- Strong leadership, organization, communication and relationship management skills preferred

Qualified candidates need to provide work samples or a portfolio as part of their overall application.
